

Score sheet for Solitaire

A row for each game

Date _____

Vegas scoring. Each game costs 50. Each card on a foundation pays 5, so 10 cards breaks even. All 52 cards on the foundations is a win, 210 ahead for that game.

After each game, write how many cards you got onto the foundations and tick Won if all 52 made it. For Vegas scoring, write the game's result (5 for each card, less 50) and add it to the running total. A result below zero takes a minus sign.

Game	Cards on the foundations	Won	Vegas scoring
